RACING

1998 - 2012 - Kart racing

2016 - first season of racing Caterhams, fourth in the Graduates championship (Supers)

2017 - currently first in the Graduates championship (SigMax).

COMPETENCY PROFILE

Speed

Above all I am a fast racing driver. Since karting as a youngster, I've always been competing at the front of the pack. I've secured multiple podiums, karting championships and lap records, and have been involved in very few racing incidents that have been my own making. Currently joint lead of the Caterham Graduates Sigmax class.

Instruction - driver coaching

As a karter, I spent several years offering driving coaching to promising juniors and adults, offering trackside instruction and on track driver tuition (drivers following me round etc.). Recently I have voluntarily been coaching friends and family in one of our Caterhams.

Instruction - groups

In my role as Circuit Manager at Karting North East (Warden Law Motorsport Centre) I was responsible for group instruction and briefings (amongst many other things). This included some particularly challenging groups, such as stag parties, children's parties and rehabilitation programmes for excluded children.

Motorsport event organisation

I've worked closely with the MSA to run MSA approved meetings, club level race meetings, special race events using our own fleet of vehicles and exclusive circuit hire events.

Race vehicle preparation

Operating both my own karting team and my own Caterham team, I've always been practiced at maintaining vehicles to the highest standards and preparing them for racing.

Commercial

As well as my motorsport ventures I currently own and run a successful occupational health company. This includes every aspect of business and people management, giving me some vital skills that are transferable across all domains, including diplomacy, calmness under pressure, assertiveness and confidence.

EDUCATION

2008 -2011 Bachelor of Science (Hons), Psychology
University of Durham
