1. *Microbiological* – followed by the micro-organisms
 2. *Antibiotic* – refers to compounds that inhibit the growth of
 micro-organisms (antibiotics) (antibiotic resistance)
 3. *Immunology* – the study of the immune system
 4. *Pathology* – the study of the causes, development and
 consequences of disease
 5. *Physiology* – the study of the functions of the body
 6. *Pharmacology* – the study of the effects of drugs
 7. *Therapeutics* – the study of the treatment of disease
 8. *Preventive medicine* – the study of the prevention of disease
 9. *Public health* – the study of the health of the community
 10. *Health care* – the study of the care of the individual

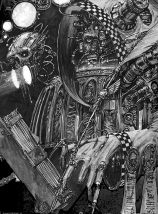

The windows are made of leaded glass and are set in a stone frame. The left window is a large, tall, narrow window with a pointed arch. It features a central figure, possibly Christ, seated and surrounded by other figures. The right window is a smaller, wider window with a pointed arch. It depicts a landscape scene with a large, dark, rocky formation in the foreground and a smaller figure in the background.
